

HI 6400 MEDICAL SCRIBE PROFESSIONAL

PROGRAM DETAILS

The demand for Medical Scribes in the United States continues to grow, as more and more physicians and health care providers realize the benefits scribes bring to their practice. Traditionally, for every hour that physicians provide direct face time to patients - 2 more hours are spent on Electronic Health Records and other clerical work. A growing strategy to decrease this clerical burden is to use Medical Scribes trained to document patient encounters in real-time. Studies have shown that Scribes improved all aspects of physician satisfaction, including overall satisfaction, physician facetime with patients, time spent charting, chart quality, and chart accuracy.

Since the EHR is at the core of a Medical Scribe's daily job functions, students will gain knowledge of medical clinic workflow systems by engaging and interacting with a Simulated Software Application. Students track a patient from the time the patient calls for an appointment through the entire revenue cycle. The book and software activities included in this program use a building block approach to learning the medical clinic workflow processes. This approach ensures that students are prepared to synthesize and organize medical data into a coherent entry so that it complies with office protocols, federal regulations, and insurance requirements.

The payment for the MSCE credentialing exam is included in your program tuition, which when passed grants status as an Apprentice Medical Scribe Professional (AMSP).

COURSES

PS-1011 - Professionalism in Allied Health

HI-1014 - Introduction to Human Anatomy and Medical Terminology

HI-6015 - Medical Scribe Essentials

AT THE END OF THIS PROGRAM, YOU WILL BE ABLE TO:
