

# HI 2100 PHARMACY TECHNICIAN SPECIALIST

## PROGRAM DETAILS

Certified Pharmacy Technicians play vital roles in the healthcare system. In the past, technicians were looked upon as people behind the counter who fill prescriptions and count pills. With the evolving and expanded role the pharmacy technician plays, your professional services will ensure that patients receive the best health care outcomes and obtain the best results from their medications.

This 16-week online Pharmacy Technician certification program provides comprehensive training in the areas of Human Anatomy and Medical Terminology, and Pharmacy Technician Principles and Practices.

The Pharmacy Technician Certification program is designed to equip you with the knowledge required to gain the Certified Pharmacy Technician certification (CPhT) through the Pharmacy Technician Certification Board's (PTCB) exam.

This is a Certification Preparation program and DOES NOT contain all required components of an ASHP-Accredited program, specifically the simulation/lab component and a required externship. For information refer to our accredited RX-3000 program.

## ISSUING AUTHORITIES

While this training and related target certifications may be accepted and/or approved by your state of residency, employers reserve the right to dictate pre-requisite education, experience, or certification/licensure requirements for their positions. These requirements may exclude a graduate from eligibility. We strongly advise students to research target job posts from area employers and relevant state requirements, barriers or restrictions to ensure eligibility upon graduation.

This program is not accepted in the following states: SC, LA, SD, MD, VA, WV, UT, ND, OH, MI. Please consider our RX3000 program instead.

WA State - speak to your Enrollment Advisor prior to enrolling
